

# SolarPatio™

## The Hardest Working Patio Under the Sun

### Ideal solution for:

- Existing Residences,
- Manufactured Housing
- Off-grid dwellings
- PHEV & Electric Automobile Ports

### • COMPLETE SOLUTION INCLUDES:

- 90mph Wind & Seismic rated pagoda style cover
- Solar Panels according to needs
- Inverter equipment for AC or DC output with Net Metering
- Gridtie integration equipment

### • OPTIONS INCLUDE:

- Battery connected solution
- Multiple patio sizes & PV collector quantities.

### • BENEFITS

- ⇒ More cost effective in terms of materials needed for installation and labor costs, than traditional on-building roof installations.
- ⇒ Properly placed, the SolarPatio™ can cool an attached dwelling by as much as 20° F, representing further energy savings.
- ⇒ Multiple purpose design enhances your home's outdoor living area, providing shade for work and play, while generating energy captured by the Photovoltaic panels.

Welcome to your self-contained alternative power generation solution

SolarPatio™
